

Microtrenching Resources

Project Resources Group, a leader in construction management and plant damage recovery services since 2001, focuses on providing strategic microtrenching resources for businesses and industries. PRG's custom reporting structure allows live data to be viewed at any given time with reports generated for review with vendors and staff to better understand the overall project health and highlight areas for improvement.

Guided by our standards manual and real-time data, we ensure quality construction that adheres to project specifications using strategic microtrenching resources. We work with numerous vendors spanning multiple markets so that the end result is maximum footage while maintaining full product quality.

PRG's back office support works with field personnel and vendors to confirm cable locations, as-builts, splicing matrices and signal losses to meet all market standards. Ensuring that vendors are successful while maintaining your specs, standards, and schedule allows everyone on the project to succeed

Benefits of Our Service

- Detailed QA/QC & Production Reports
- Construction Process Improvements & Efficiency Gainers
- As-Built Verification and Closeout Review
- Specs and Standards Education
- Time and Motion Studies include Crew Size, Resource Allocation, Equipment Combos, Hopper Backfill and many others

Advanced Microtrenching Resources

INDUSTRY LEADER

We have extensive experience in power, gas, broadband, telecom, field investigation practices, local and national dig laws, business-to-business collections and litigation.

WE GET RESULTS

We have a proven track record of success for resolving damage claims effectively, resulting in lower costs and higher returns on investment.

TRACK YOUR CLAIMS

View real-time status, as well as photos, videos and other components of your claim's file using our web-based entry and tracking system.

OPEN COMMUNICATION

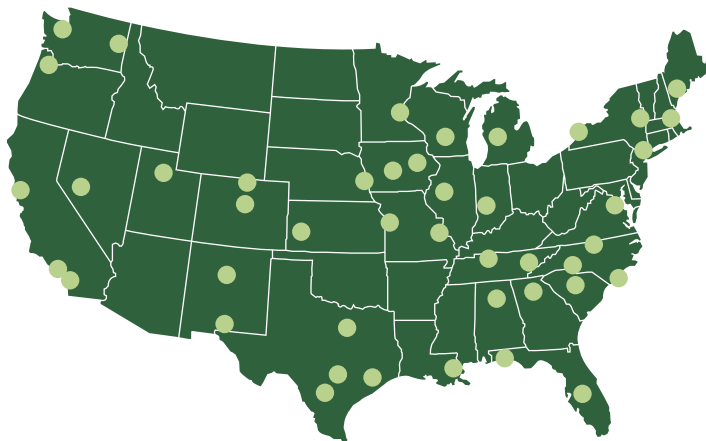

We provide monthly reports and in-depth analyses tailored to your needs and local market, maximizing recovery efforts

Why PRG?

With over twenty locations across the US, PRG has been a leading provider of microtrenching, communication construction management, network infrastructure, plant damage investigation and recovery since 2001.

PRG's leaders include well-known and respected executives from the communications and cable industries, bringing years of expertise from careers with major service providers.

We build solutions that help drive sustainable profitability, conserve resources, improve efficiency, better customer relationships and increase earnings.
