

Long-Haul Fiber Build QA/QC

PRG delivers end-to-end quality control programs that identify risks, ensure compliance, and support proactive asset management across extensive fiber corridors.

Our teams combine field expertise, standardized processes and scalable reporting to provide accurate, actionable insights that support informed decision-making. As market demands continue to evolve, PRG partners closely with clients to develop flexible, value-driven solutions that enhance network reliability and drive sustainable outcomes.

PRG's project managers oversee planning, reporting and risk management, ensuring compliance and readiness for service. Our design technicians verify fiber testing and as-built documentation for every client requirement. Compliance inspectors from PRG conduct daily site visits to ensure contractor compliance with all standards and safety needs.

PRG's implementation of proactive management practices significantly enhances material accountability and communication, reducing confusion, improving visibility and leading to more efficient and effective operations.

Program Benefits

- **Issue Tracking:** PRG actively monitors top and recurring issues to engage contractors with data-driven insights and clear reduction strategies.
- **Education & Training:** We provide targeted training and educational resources to contractors, establishing a defined pathway to minimize or eliminate persistent errors.
- **Collaborative Solutions:** Beyond identification, PRG is committed to engineering solutions that drive mutual success for both clients and contractor partners.

QUALITY ASSURANCE

Our programs are designed to proactively identify risks, mitigate systemic issues, and ensure every aspect of work is executed in full compliance with design standards, safety protocols, and contractual requirements.

COMPLIANCE

Daily site visits, meetings and reports ensure contractor compliance with client standards, plans, and safety requirements. Working with local government inspectors, our team utilizes restoration verification, contractor coaching, splice diagrams, fiber traces and RFI reviews to maintain compliance.

TRANSPARENCY

A third-party field-focused, hands-on approach enables our clients to optimize internal resources while maintaining complete transparency into project quality and performance.

MANAGEMENT

PRG enhances vendor field operations by conducting workshops, providing ongoing training and facilitating a platform for questions and clarification. Our focus on job site safety and continuing education significantly promotes better compliance and efficiency.

Why PRG?

EXPERIENCE

Since 2001, PRG has been a leading provider of communication construction management, network infrastructure, plant damage assessment and recovery.

Operating in 48 states with over 900 team members, PRG is a trusted provider of long-haul route inspection and quality control services.

LEADERSHIP

PRG's leaders include well-known and respected executives from the communications and cable industries who bring years of expertise from careers with major service providers. Each has spent years focusing on identifying risk areas while designing and helping implement value-added solutions. This experience has become the core foundation of PRG and the services we offer today.

RESULTS

We build solutions that help drive sustainable profitability through conservation of resources, improved efficiency, better customer relations, and increased earnings.
