

Fiber Guardian Program

PROTECT VIA PRESENCE = PREVENTION

The escalating value of today's fiber infrastructure is due mainly to the accelerated use of high count fiber. Damages to these assets from mislocated sites and dig negligence result in costly, preventable mistakes.

The Project Resources Group (PRG) Fiber Guardian Program provides a full damage prevention solution utilizing proven project management, field execution, reporting and analysis. Highly skilled, field-experienced personnel ("boots on the ground") provide on-site analysis in real time.

Our field team uses a proprietary app to track site visit details, including GPS time stamping, location pictures, key contacts and root findings. The executive dashboard provides a real-time look at volume, results and costs. Customizable to your specifications, push notifications and additional data points can also be added as needed.

Program Elements

- Excavator Relationship with Local Contractors
- Local Dig Law Knowledge
- Locate Marking Verification
- Daily Construction Touch Points
- Efficient Analysis of 811 Tickets
- Oversight of Assigned Tickets
- Large Count Fiber Project Protection
- Collaboration with Local Locate Companies
- Customizable Dashboard Reporting

***High count fiber
protection with damage
prevention***

Program Results

The Fiber Guardian Program has shown that a small percentage of all ticketing from the local call, prior to the dig, results in a dramatic reduction in damages.

PRG's presence results in damage prevention by positioning an on-site representative to protect client assets and ensure that the contractor is cautious around critical fiber.

Overall knowledge of construction methods, local and national dig laws combined with experienced field personnel results in data driven program success.

Contact PRG today to explore how this fully customizable program can support and enhance your team.

Damage Prevention Program

PRG's Fiber Guardian Program provides increased efficiency and transparency that results in the reduction of overall damage costs, an increase in customer retention and heightened overall satisfaction.

Why PRG?

Since 2001, PRG has been a leading provider of communication construction management, network infrastructure, plant damage assessment and recovery.

PRG's leaders include well-known and respected executives from the communications and cable industries. They bring years of expertise from careers with major service providers.

We build solutions that help drive sustainable profitability, conserve resources, improve efficiency, better customer relationships, and increase earnings.
